

An economical, flexible and extendable line alarm system that provides protection for display merchandise.

## VSO

The VSO (Data Unit) enables data read out from the VSM (Main Unit) and data analysis.

**VSO (Data Unit)** The interface for security data analysis.

- › Provides data on functionality, operations and alarm patterns (number of alarms, what key was used, time & date of breach, item removed)
- › System requires a separate power supply
- › Data is collected from the VSM by either of two ways:
  - By Memo Key
  - By connecting VSO to VSM via a network cable
- › Alpha will provide a printed report for analysis
- › With the VSO software, data can be formatted into various chart methods
